musical bags.com

We have been innovating for **35 years** to provide the best solutions to protect musical instruments and to travel with them.. Our cases are special because they are **handmade** and because we care about every detail of them. Working with important musicians is crucial for us because our products are the result of their experience.. BAGS cases are fully made in **our workshop in Spain**, from its design to the manufacturing process, up to the highest European quality standards. The main European instrument brands such as **Buffet, Engelbert Schmid, Paxman, Courtois, Besson, Voigt, Haag**, etc ..., trust us to manufacture their cases.

1989 We started to make the first cases of the **Professional Line**. Main improvements of these cases were the use of high-density foams, the introduction of wood and paperboard protections to preserve the instruments and the incorporation of hangers and straps to ease transportation. All these improvements represented a breakthrough in the sector.

1995 Cases of **Confort line**, made with expanded polystyrene, provided more protection to the instruments, These cases had a lot of success among students and professionals in more than 20 countries. Their design set a benchmark in the sector and was used afterwards by numerous manufacturers

2000 We continued innovating with **EcoBags line**, by introducing new designs and improving their transport. Thanks to new handles, hangers, wheels and trolley system. Travelling with instruments became much more easy and confortable.

2010 We introduced Fiberglass in our cases with **SuperBags line**. With this material we reduced the volume of the cases to facilitate their transport especially by plane. At the same time we kept the same protection standards, offering fancy and trendy designs. This line became very popular and the first option for professional musicians in more than 26 countries like Germany, Australia, Canada, USA, Spain, France, England, Netherlands, Italy and Japan.

2014 We developed **Evolution line**, as a result of our constant wish to protect, we did everything possible to transport and keep the instruments in perfect condition. continue improving our cases. This line marked a turning point in Bags. Our cases became not only better outside but also inside; new designs up-to-date made of fiberglass and top quality finishes along with a better use of space making them more versatile, ergonomic and lighter.

BAGS was founded by the **Rivera Mota** family, since **2019** the **Spanish Brass**, is in charge of this brand, developing new models for the brand itself and new designs for different International instrument makers that will soon be presented.

CLARINET

All our new generation **BAGS** cases incorporate significant improvements in terms of protection, functionality and versatility.

The instruments rest on elastic supports suspended inside the case. In this way, the transmission of impacts is minimal and the drying of the pads is much easier. It can be comfortably carried as a backpack due to its two built-in ergonomic straps attached to the frame that make carrying the instrument easy and safe even on bicycle or motorcycle.

Inside: Polystyrene structure and high density polyurethane foam. Foamed high-quality velvet lining.

Outside: Glossy Fiberglass. YKK zipper closure. Includes handles.

Its new and versatile design allows it to be used with the most globally recognized current brands and models (Buffet, Selmer, Yamaha, etc.)

CLARINET CASE EV-3

This model has been designed for only one **Bb Clarinet**. The case includes space for **1 mouthpiece** and **2 barrels** plus 1 inside compartment for accessories, and an external bag. This case has removable straps and resin snap hooks.

Weight.- 1 kg

External dimensions .- 19'5 x 10'5 x 40 cm

DIFFERENCE BETWEEN BASIC, METALIC AND INNO

BASIC

Composition

- > Inside: Polystyrene structure and high density polyurethane foam. Foamed high-quality textil lining
- > Outside: Fiberglass glossy.
- > YKK zipper closure. Both sides in the same color. With handles and straps for hanging on the back.
- > Resin snap hooks.

METALIC

Composition

- > Inside: Polystyrene structure and high density polyurethane foam. Foamed high-quality velvet lining
- > Outside: Fiberglass glossy with metal particles
- > YKK zipper closure. With handles and straps for hanging on the back.
- > Metallic snap hooks.

INNO

Composition

- > Inside: Polystyrene structure and high density polyurethane foam. Foamed high-quality velvet lining
- > Outside: Fiberglass glossy with metal particles that produces an iridescent effect.
- > YKK zipper closure. With handles and straps for hanging on the back.
- > Metallic snap hooks.

ATTENTION!!!

All our **Metalic** and **Inno cases**, the front part is made in the selected color and the back part in **graphite color**, except for the **graphite metallic and black metallic**, in which both parts will be **graphite metallic and black metallic** respectively.

All our products have a legal warranty of 3 years for manufacturing defects in materials and workmanship. Within this period, if your product has a manufacturing defect, we offer you the possibility of having the product repaired free of charge or replaced with a new one, as appropriate after assessing each case.

This 3-year warranty is in response to the legislative change in art. 16.7 of Royal Decree-Law 7/2021 of April 27th and affects products purchased from 01/01/2022. For products purchased prior to this date, the current legal warranty is 2 years.

In all cases and in order to assess the warranty of your product, it will be essential that you provide us with the receipt or proof of purchase. Otherwise, we will not be able to evaluate or process the warranty.

The warranty does not cover damages that the product may suffer as a result of accidents, improper care, negligent use and normal wear and tear due to use or the natural deterioration process of the fiber.

All our warranties are subject to prior appraisal.
